**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Fisher (US 6546704).

Regarding claim 1, Fisher discloses a protective sleeve comprising of a pad of resilient material (48) and means for fastening the pad on the pastern (56, 57). See figure 2 and 4.

Regarding claim 2, Fisher discloses a fastening means consisting of a hook-and-loop mechanism (see column 2, line 38).

Regarding claim 3, Fisher discloses one side of the hook-and-loop mechanism being attached to the pad (48) and the other side being attached to a strap (40) attached to the upper portion of the pad. See figure 4.

Regarding claim 4, Fisher discloses an inner layer of fabric (not referenced) attached to the pad (48). See column 3, line 24.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher (US 6546704). Fisher is discussed above. The claims differ from Fisher in calling for the pad to be 6 inches high with the top portion 2 inches tall and 10 inches wide, and the bottom portion 4 inches tall with a width of 10 inches at the top and 5 inches at the bottom. It would have been an obvious matter of design choice to dimension the pad as stated above, since such a modification would have involved a mere change in size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher (US 6546704) in view of Meyers (US 5715661). Fisher is discussed above.

Claims 7-10 differ from Fisher in calling for a horse boot. Meyers discloses a horse boot (10). See figure 1. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Fisher's protective sleeve to include a horse boot for the purpose of providing a layer of protection between the horse hoof and the boot.

Claims 11 and 12 differ from Fisher as modified in calling for the pad to be 6 inches high with the top portion 2 inches tall and 10 inches wide, and the bottom portion 4 inches tall with a width of 10 inches at the top and 5 inches at the bottom. It would have been an obvious matter of design choice to dimension the pad as stated above, since such a modification would have involved a mere change in size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).
